

20 years of precision with passion – Audi Hungaria Tool Factory celebrates its anniversary

- **The Győr-based Tool Factory has been a technological centre of premium car manufacturing for 20 years**
- **More than 3 million body parts and 3,200 press tools**
- **Precision solutions for future electric models will also come from Győr**

Győr, 15 October 2025 – Audi Hungaria Tool Factory celebrates its 20th anniversary this year. To mark the anniversary, the company looked back to its beginnings and presented how the Győr plant has become one of the largest and most innovative tool factories in Central and Eastern Europe. The history of the Tool Factory has been and will continue to be about knowledge, continuous development and shared success – and it will continue to follow this path in the future as well.

In 2005, the Audi Hungaria Tool Factory started out on 18,000 m² with 185 employees. Since then, more than 3 million automotive body parts, 3,200 press tools and 5,500 assembly appliances and equipment have been produced here with unrivalled precision. Over the years, the three pillars of the tooling factory – exclusive series production of body parts, tooling, and appliance and equipment manufacturing – have reached their full potential in projects related to low-volume vehicle models. The body parts for the Audi R8, Lamborghini Huracán, Bentley and Audi e-tron GT have all been made in Győr.

"The Tool Factory is the technological flagship of Audi Hungaria. The knowledge and dedication of the highly skilled professional community working here enables us to offer world-class solutions to our partners," said Michael Breme, Chairman of the Board of Management of Audi Hungaria.

Throughout its history, the Tool Factory has been constantly expanding: new halls, production equipment, such as high-performance presses, have been added to the 58,300 m² plant. In addition to production competences, the necessary expertise in maintenance, quality assurance, logistics and project management has been developed.

"For us, precision is not just a goal, it's our passion. The results of the past 20 years, the many vehicle projects that have been implemented, prove that the highest level of press tool, equipment and exclusive component manufacturing is available in Győr, and will continue to be so in the future. This is guaranteed by the knowledge of our more than 500 employees," said Zoltán Les, Member of the Board of Management of Audi Hungaria responsible for Vehicle Production.

Based in Győr, AUDI HUNGARIA Zrt. is a member of the Audi Group and is the main powertrain supplier of the Audi and Volkswagen Groups. The company manufactures close to 1.7 million powertrains each year, including electric motors. The Audi Q3 and the Audi Q3 Sportback models (which are also manufactured with electric drivetrains) are manufactured in Győr. Audi Hungaria supplies a large number of aluminum body parts for various brands of the Volkswagen Group, and also performs increasingly large-scale development activities (vehicle drive and vehicle development). The company provides a wide range of services for the entire Volkswagen Group, primarily in the areas of technical development, finance, IT and procurement. Audi Hungaria is among the companies with the highest turnover, one of the largest exporters in Hungary and the biggest investor in the Hungarian automotive industry. Audi Hungaria has been carbon neutral since 2020 and is the largest employer in the region.
